

# King's Crown

Level: Medium

Finished Size: 25cm (10")

This block measures 25cm (10") when sewn with a 1/4" seam allowance, (after trimming back to a true square when completed).

Use a plain background and two fabrics to make the crown, as in the sketch to the left, or reverse it, using a patterned background and white/solid colours for the crown itself.

Why not mix and match these styles to form a really interesting quilt, with or without sashing between the blocks.

## Getting Started

Print or trace the templates shown here onto card and cut out. Now trace the pieces onto your fabrics and cut out (the number of pieces required and fabric suggestions are shown on each of the templates).

## Piecing Together

Start by sewing the bottom left triangle on to the long strip of fabric that forms the bottom of the crown (shown in aqua in the image to the left). Place these pieces to one side.

Now piece together the main part of the crown by sewing together the small squares and triangles (shown in white, and orange in the image above) making a large triangle.

Now attach the white strips to the top and right sides of the triangle you just made.

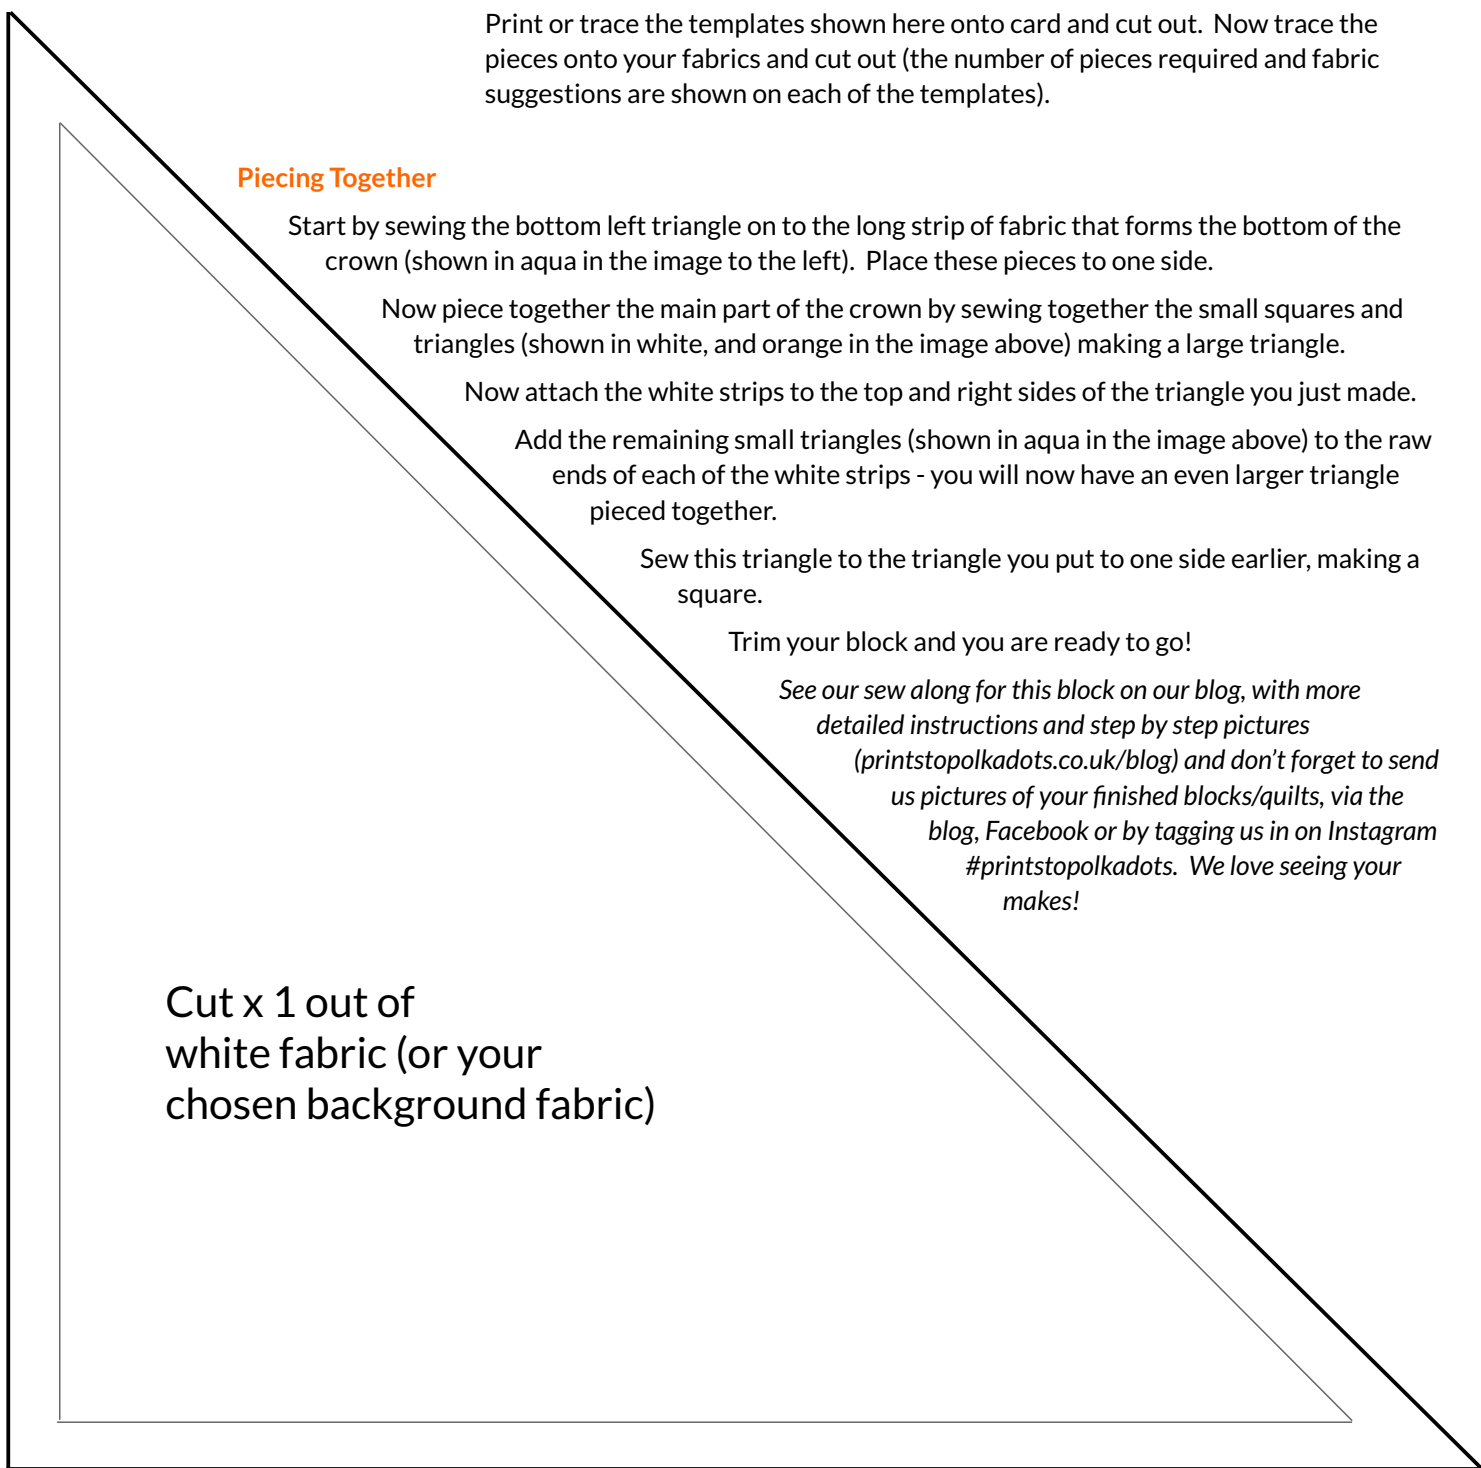

Add the remaining small triangles (shown in aqua in the image above) to the raw ends of each of the white strips - you will now have an even larger triangle pieced together.

Sew this triangle to the triangle you put to one side earlier, making a square.

Trim your block and you are ready to go!

*See our sew along for this block on our blog, with more detailed instructions and step by step pictures ([printstopolkadots.co.uk/blog](http://printstopolkadots.co.uk/blog)) and don't forget to send us pictures of your finished blocks/quilts, via the blog, Facebook or by tagging us in on Instagram #printstopolkadots. We love seeing your makes!*

Cut x 1 out of white fabric (or your chosen background fabric)
